

Why Powder Coating?

Powder coating gives your part a protective, durable, and smooth finish that will last a lifetime. The possibilities are endless when choosing a finish that is just right for your project. Powder coating is the number one choice for the best finish when protection and presentation matters.

Your Parts Done Right

Since 2000, Coating Methods, Inc. has been committed to developing and providing powder coating services & solutions that are tailor-made to meet the specifications of its customers. Our automated lines can handle any size order, big or small. Choose from hundreds of colors to customize your project just the way you envision it, and our experienced staff at Coating Methods, Inc. will make sure your parts are done right before they leave our facility.

Our shop has provided powder coating services for major retailers such as Home Depot, Lowe's, Menards, JCPenney, Kohl's, Target, Walmart, Serta, Pep Boys, Skechers, T-Mobile, Verizon, AT&T, and many more.

Electrostatic Powder Coating

Our conveyerized systems can handle any quantity of parts, big or small, and our sophisticated, state-of-the-art pre-treatment wash system assures superior adhesion and a highly uniform finish that meets rigorous testing standards. Choose from hundreds of powders, including epoxies, polyesters, hybrids, urethanes, textures, metallics, architectural, specialty finishes, FDA/USDA finishes, and custom color matching upon request.

- Max Part Size: 6.5' x 4.5' x 30'
- 1 - 8 Mil Coverage
- Light/Heavy Assembly Available

Paint Stripping & Refinishing

Save time and money by refinishing old displays and parts to give them a fresh new look and extend the life of your products. Our shop has burn off capabilities on site to remove previously applied coatings on metal substrates, or certain by-products of metal manufacturing processes that require removal from time to time. Our burn off equipment has computerized controls to ensure tight tolerances are maintained throughout the process.

Paint Stripping: Max part size - 5' x 6' x 10'
Metal Refinishing: Parts up to 15' in length

Media Blasting

Every item entering our facility has a surface that must be properly prepared for powder coating. Media blast cleaning is an excellent form of surface preparation as it ensures optimal coating adhesion.

Media Blasting Advantages Include:

- Provides better coating adhesion due to the rough surface profile after media blasting
- Steel and aluminum oxide grit can remove tough rust easily from hard to reach corners
- Media blasting is very cost effective and minimizes preparation time prior to powder coating

Max Part Size: 15' x 10' x 6' (blast booth)
3' x 1.5' x 1.5' (blast cabinets)

Aluminum Oxide - 80 Mesh and Steel Grit - 80 Mesh

Assembly & Packaging

Light to heavy assembly of finished components is a value added service we offer our customers. Additionally, we offer final packaging of finished goods including adding hardware and instructions to the final pack. This allows our customers to decrease their transportation and handling costs, along with shorter lead times to the end user of the finished product, getting your customer their parts faster.

Centrally Located, Easy Access For Shipping

Conveniently located in the heart of the Midwest's Industrial Corridor, our shop is located near major expressways and can easily service Illinois, Wisconsin, Indiana, Iowa, Ohio, Michigan and Missouri. Our shop offers three docks to receive parts for painting and shipping back to you, or drop ship directly to your customer's facility.

Pick Up and Delivery Services Available

Save time and money with our convenient and economical local delivery services. Our 26 foot truck is available to pick up and drop off your parts at your facility or at your customer's facility. Call us for more details and pricing for our pick up and delivery.
