

# WHY POWDER COATING?

Environmentally friendly and economically sound, powder coatings are the preferred choice of the finishing industry.

**Durable:** Powder coatings can resist cracking, peeling, or marring, which can minimize shipping and handling damage. The finish reduces porosity — resulting in fewer surface imperfections. Extremely abrasion, corrosion, and chemical resistant, powder coatings provide a finish superior to other organic coatings.

**Environmentally Compliant:** Powder coatings, consisting of 100% solids, are organic compounds which meet all EPA standards.

**Versatile:** Powder coatings offer excellent uniformity - eliminating sags, drip marks and other surface irregularities.

**Cost Effective:** The use of powder coatings reduces equipment, energy, labor and waste disposal costs compared to conventional liquid systems.

## Industries Served

- Medical
- Hospitality
- Aerospace
- Furniture
- Computer
- Retail
- Marine
- Automotive
- Military
- Hardware
- Electronics
- Sporting Goods
- Fashion
- Appliance
- Shelving
- Architectural
- Home Furnishings
- Lawn & Garden
- Agricultural
- Machinery
- Lighting
- Fencing
- Grocery
- Food Processing
- Industrial
- Transportation
- and Yours

## Powder Coating Specialists

# You're Covered with Coating Methods

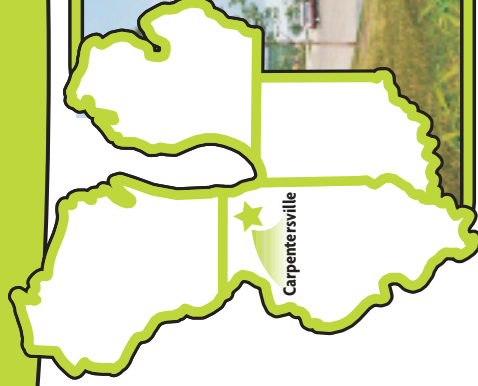

### Coating Methods, Inc.

853 Commerce Parkway  
Carpentersville, Illinois 60110

## Coating Methods, Inc

Conveniently located in the Midwest's industrial corridor, we easily service Illinois, Wisconsin, Indiana and Michigan.

# A Permanent Solution for all your Coating Needs

## Products and services

### Electrostatic Powder Coatings

Powder coating is limited only by the imagination!

- Epoxies
- Polyesters
- Hybrids
- Urethanes
- Textures
- Special Finishes
- Custom Color Matching
- FDA/USDA Finishes

#### Capabilities:

- 1 - 8 Mils Coverage
- On Time Delivery
- Special Packaging
- Conveyorized
- High Volume
- Part Size - 6.5' x 4.5' x 24'

### Quality Assurance

We meet or exceed all customer quality standards. That means stringent adherence to customer specifications and providing a uniform product from start to finish. It's a matter of building quality consistently

### Stripping services

Coating Methods has burn off capabilities on site to remove previously applied coatings on metal substrates, or certain by-products of a metal manufacturing process which need removal from time to time.

#### Capabilities:

- Max Part Size - 5' x 6' x 10'
- High Volume

### Sand Blasting Services

Coating Methods has 2 separate sand blasting operations on site to accommodate your specific needs.

#### Capabilities:

##### Aluminum Oxide - 80 Mesh

- Max Part Size = 3' x 1.5' x 1.5'
- High Volume

##### Steel Grit - 80 Mesh

- Max Part Size = 15' x 10' x 6'
- High Volume

### Refinishing Services

A program designed to save you money.

- Servicing the hospitality, wholesale, retail and medical industries.
- Refinishing available on metal substrates up to 15' in length.
- Available in electrostatic or thermoplastic powder coatings relevant to size.

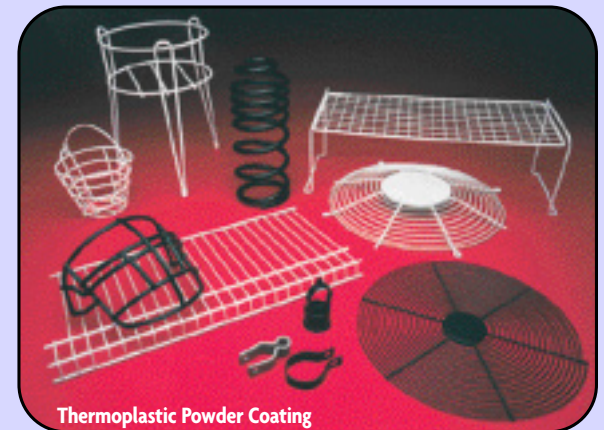

### Thermoplastic Powder Coatings

Our thermoplastic powder coatings are applied by the fluidized bed process to insure maximum coating coverage.

- Nylon 11
- Vinyl
- Polyethylene
- Custom Color Matching
- Polyester
- FDA/USDA Finishes

#### Capabilities:

- 8 - 50 Mils Coverage
- On Time Delivery
- Special Packaging
- Conveyorized
- Part Size - 6.5' x 3.5' x 3.5'
- High Volume
